

A man with a beard and glasses, wearing a white cap with a signature and a floral shirt, is in the foreground. Behind him is a classic orange car on a blue BendPak lift in a well-lit garage. The lift has 'BENDPAK BP' written vertically on its post.

This is my BendPak

There are many, but this one's mine.

"The custom cars that I build are the finest in the world, so I chose BendPak to meet my standards. They make working much easier, but most importantly, their equipment is reliable and safe. My customers expect the absolute best from my shop and to provide them with that, I only use top quality equipment."

– Boyd Coddington, Hot Rod Designer
and Star of TV's "American Hot Rod"
